

Company Profile

Powering the Future of Energy

Headquartered in Muscat, Oman. **At ASYAD Energy & Technology**, we are shaping tomorrow's energy landscape today. We stand as a premier integrated energy solutions provider with a truly global footprint. Our expertise spans the complete oil and gas supply chain—from upstream exploration to downstream refining/distributing and everything in between—delivering innovative, reliable, and sustainable solutions that meet industry standards and set new industrial best practices.

Engineering Excellence for a Complex Energy World

In an era of rapid transformation, we combine:

Cutting-edge technology that drives efficiency and innovation

Strategic infrastructure designed for tomorrow's challenges

Unparalleled industry expertise built on decades of regional and global experience

This powerful combination enables us to empower our clients with the tools, knowledge, and solutions needed to confidently navigate the modern energy landscape's complexities and capitalize on emerging opportunities.

Our Differentiators:

- * Comprehensive Value Chain Coverage: Seamless integration from upstream to downstream operations
- * Technology-Driven Solutions: Leveraging digital transformation to optimize performance
- * Sustainable Innovation: Pioneering cleaner energy solutions without compromising reliability
- * Global Perspective, Local Expertise: Deep regional knowledge with international capabilities

Whether you're looking to enhance operational efficiency, expand your energy portfolio, or future-proof your business, ASYAD Energy & Technology delivers the strategic partnership and technical excellence you need to succeed in today's dynamic energy markets.

Our Mission

"Excellence Through Innovation and Integrity"

ASYAD Energy & Technology is committed to delivering superior energy solutions through operational excellence, technological leadership, and sustainable value creation. We enhance efficiency, mitigate risks, and generate long-term value for our global partners while maintaining the highest standards of integrity and environmental responsibility.

Our Vision

"Shaping the Future of Energy"

As an emerging and promising leader in the energy sector, ASYAD Energy & Technology drives industry transformation through innovation, strategic partnerships, and sustainable solutions. We are building a more efficient, sustainable, and resilient global energy ecosystem that meets today's needs while preparing for tomorrow's challenges.

Core Values

"The Pillars of Our Promise"

At ASYAD Energy & Technology, our values define who we are and how we operate. These pillars are the foundation of every solution we deliver and every relationship we build:

Integrity Without Compromise

We uphold the highest ethical standards in all our operations, ensuring transparency and accountability in every decision. Our commitment to doing business right builds lasting trust with partners worldwide.

Innovation That Transforms

We challenge conventional approaches through cutting-edge technologies and forward-thinking solutions. Our culture of continuous improvement drives progress across the energy supply chain.

Sustainability In Action

We balance economic growth with environmental responsibility, developing energy solutions that meet today's needs while safeguarding tomorrow's resources.

Excellence As Standard

We set and surpass industry benchmarks through meticulous execution, operational discipline, and an unwavering pursuit of quality in everything we do.

Collaboration That Creates Value

We believe our greatest achievements come through partnerships - sharing knowledge, combining strengths, and working together to solve the energy sector's most complex challenges.

These values guide our daily operations and strategic direction, aiming to reach and remain at the forefront of the global energy industry while maintaining the trust of our partners and stakeholders.

Leadership. Innovation. Sustainability

These three principles define our commitment to shaping the future of energy.

Leadership

We lead with vision and responsibility. As an industry pioneer, we set benchmarks for operational excellence while guiding the sector through complex transitions. Our leadership extends beyond business performance to thought leadership—developing solutions, sharing expertise, and driving meaningful progress across global energy markets.

Innovation

We power progress through technology and ingenuity. By integrating advanced digital solutions, AI-driven analytics, and cutting-edge engineering, we transform challenges into opportunities. Our culture of innovation ensures we continuously improve efficiency, safety, and performance—delivering smarter energy solutions for a changing world.

Sustainability

We operate with tomorrow in mind. Sustainability is embedded in our strategy, from reducing emissions and optimizing resource efficiency to investing in renewable energy and circular solutions. We believe responsible energy development must balance economic growth with environmental stewardship—ensuring lasting value for both business and society.

Together, these principles guide our decisions, differentiate our solutions, and reinforce our promise: to deliver energy excellence today while building a more sustainable future.

Core Services

Integrated Energy Solutions for a Dynamic Market

At ASYAD Energy & Technology, we deliver comprehensive, end-to-end services across the entire energy supply chain—combining technical expertise, advanced engineering, and sustainable practices to meet the evolving needs of global energy markets.

Hydrocarbon Storage & Processing

We provide secure, efficient, and scalable storage solutions for crude oil, refined products, and LPG accommodations, including custom blending and quality enhancement services. Our strategically-located terminals ensure optimal product integrity and market readiness.

Infrastructure Construction

From concept to commissioning, we deliver **turnkey energy infrastructure projects**, including:

- * **Tank farms** and storage facilities
- * **Pipeline networks** and distribution systems
- * **LNG terminals** and modular processing plants

All designed and built to the highest industry standards.

Core Services

Energy Trading & Logistics

Our integrated trading and logistics platform covers:

- * **Physical trading** of crude, refined products, and lubricants
- * **Marine operations**, including bunkering and vessel chartering
- * **Inventory management** and supply chain optimization

Ensuring reliability, efficiency, and competitive advantages for our partners & customers.

Oilfield Services & Equipment

We support upstream operations with:

- * **Well services** and production optimization
- * **Maintenance, repair, and overhaul (MRO)** solutions
- * **Specialized equipment supply** and technical support

Enhancing operational continuity, safety, and performances.

Digital Solutions for Energy Operations

We implement advanced digital technologies to optimize energy operations, including:

- * **Automated monitoring and control systems**
- * **Predictive maintenance programs (RCM, RBA...etc.)**
- * **Real-time data analytics**

Helping clients achieve greater efficiency and operational excellence.

Core Services

Project Finance Advisory

We offer strategic financial and advisory services, including:

- * **Feasibility studies** and risk assessments
- * **Joint venture facilitation** and partnership structuring
- * **Compliance and regulatory support**

Helping clients de-risk investments and unlock growth opportunities.

Petrochemical & Downstream Solutions

Our downstream expertise includes:

- * **Refinery support** and catalyst management
- * **Fuel additives** and lubricant solutions
- * **Process optimization** and yield improvement

Driving efficiency, performance, and profitability across petrochemical operations.

Energy Transition & Sustainability

We lead the shift to a low-carbon future through:

- * **Carbon capture, utilization, and storage (CCUS)**
- * **Emissions reduction** and flare gas recovery
- * **Renewable energy integration**

Delivering sustainable, scalable solutions for the energy transition.

Why Choose ASYAD?

End-to-end capabilities – From upstream to downstream and beyond

Strategic locations – Our facilities located in most strategic terminals and energy hubs.

Technology-driven solutions – Advanced engineering for modern challenges

Sustainable focus – Balancing economic and environmental priorities

Global reach, local expertise – Strategically positioned in key energy markets

Partner with us to power your energy success—today and tomorrow.

Why Choose ASYAD?

Our Oil Trading Commitment

At ASYAD Energy & Technology, we believe energy trading should be built on human connections as much as market expertise. Based in Salalah Free Zone - Oman's strategic gateway to global markets - we bring you trading solutions that combine world-class infrastructure with genuine partnership.

For years, we've stood shoulder-to-shoulder with clients through market cycles, learning that real success comes from understanding your unique business journey. Our trading process is designed to feel personal because we know every transaction impacts your team, your operations, and your future.

It starts with a conversation - where we listen carefully to your specific needs and ambitions. When you choose to work with us, you're not just getting a trading partner; you're gaining an extension of your team that cares deeply about your outcomes. We keep communication clear and frequent because transparency builds trust - and trust builds lasting business relationships.

Secure & High-Capacity Oil Storage Solutions for Your Petroleum Assets

We help you mitigate risk and maintain seamless operations in the high-stakes oil and gas industry.

Why Choose ASYAD?

Get the Safe, Efficient and Flexible Oil Storage Solutions You Need

Storing petroleum products presents challenges—including spill risks, contamination, and capacity constraints—that can lead to significant operational and financial losses. That's why choosing a storage provider that guarantees security, scalability, and reliability is critical.

At ASYAD Energy & Technology, we provide state-of-the-art storage solutions designed to safeguard your products against industry risks. Our high-capacity terminals, strategic locations, and advanced bulk storage infrastructure ensure safety, efficiency, and uninterrupted operations for your business.

A Closer Look at Our Storage Capabilities

Extensive Storage Capacity

- * Over 300,000 cubic meters of secure, high-advanced capacity storage for crude oil, LPG, and refined products. With plans on table for Scalability & Growth up to 1M+ cubic meters.
- * Scalable solutions tailored to large-scale oil & gas sector demands.
- * Integrated with most recent technologies for products quality enhancements to meet international specifications and end-users demands.
- * Fully compliant with international safety and environmental standards

ASYAD Energy Terminal

- * Located in sea port of Salalah, Oman, offering Class I & III storage
- * Total capacity of 300,000 CBM, equipped with advanced fire suppression and leak detection systems
- * Optimized for fast, efficient loading/unloading with direct access to key shipping routes

Key Operational Management of ASYAD Storage Facilities

- * Full operational control of 300,000 CBM Class I & III storage terminal in Salalah
- * Managed by industry-certified professionals ensuring 24/7 reliability
- * Dedicated to business continuity and seamless supply chain operations
